

PERFORMANCE AND FINAL SUBMISSION PHASE

PROJECT DEMONSTRATION

Create a Website using Canva

A project demonstration for a restaurant table reservation website involves showcasing the key features and functionalities of the website to stakeholders, team members, or potential users. It's an opportunity to provide a hands-on experience of how the website works and what it offers. Here's a suggested structure for a project demonstration:

Title: Restaurant Table Reservation Website Demonstration

Introduction (5 minutes):

1. Greet the audience and introduce yourself and your team.
2. Provide a brief overview of the project, its objectives, and its significance.
3. Mention the purpose of the demonstration.

Demo Agenda (2 minutes): 4. Outline the agenda for the demonstration, including the main features and functionalities you'll cover.

Live Demonstration (20 minutes): 5. **User Registration and Login (2 minutes):**

- Show how users can register for an account.
- Demonstrate the login process, including any social media login integration.

6. Table Reservation (5 minutes):

- Display how users can browse available tables by date, time, and party size.
- Walk through the process of selecting a table, including options to choose a specific table or let the system assign one.
- Make a live reservation.

7. Menu Integration (3 minutes):

- Showcase the integration of the restaurant's menu.
- Highlight any dietary information available for menu items.
- Explain how users can pre-order dishes or add special requests.

8. Availability and Capacity Management (2 minutes):

- Demonstrate real-time availability updates to prevent double bookings.
- Show how the system handles capacity limits based on restaurant layout.

9. User Profiles (2 minutes):

- Walk through user profile creation.
- Explain how users can manage personal information, reservation history, and preferences.

10. Notifications (2 minutes):

- Show automated confirmation and reminder notifications for reservations.
- Explain how waitlist status updates work.

11. Special Events and Promotions (2 minutes):

- Illustrate the integration of special events and promotions.
- Display event details, pricing, and availability.

12. Booking Restrictions (2 minutes):

- Explain any restrictions in place, such as maximum reservation lead time and holiday bookings.

13. Admin Features (2 minutes):

- If applicable, showcase admin features for restaurant staff to manage reservations, view bookings, and generate reports.

14. Feedback and Support (1 minute):

- Describe how users can provide feedback and access customer support.

Q&A Session (10 minutes): 15. Open the floor for questions and answers. Address any queries from the audience.

Conclusion and Next Steps (3 minutes): 16. Summarize the key points demonstrated during the session.

17. Discuss the next steps in the project, including testing, launch, and potential improvements.

Thank You (1 minute): 18. Thank the audience for their time and participation in the demonstration.

Additional Tips:

- Use a test environment or a live development version of the website for the demonstration.
- Have clear, step-by-step scripts or notes for each feature you demonstrate.
- Be prepared to troubleshoot and handle unexpected issues during the live demonstration.
- Encourage feedback and gather suggestions from the audience.

Remember to keep the demonstration focused on the most important features and functionalities, ensuring that the audience leaves with a clear understanding of how the restaurant table reservation website works and the value it provides to users and restaurant owners.
